**Caution:**

- The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including fax machines, to send any message unless such message clearly contains in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity, or other individual sending the message and the telephone number of the sending machine or such business, other entity, or individual. (The telephone number provided may not be a 900 number or any other number for which charges exceed local or long-distance transmission charges.) In order to program this information into your fax machine, you should complete the instructions on page 24 to page 27.
- Note that the images of copied or received documents will remain on the used ink film. Use discretion when disposing of the used ink film.
- Do not rub or use an eraser on the printed side of recording paper, as the print may smear.

**Energy Star:**

- As an ENERGY STAR® Partner, Panasonic has determined that this product meets the ENERGY STAR guidelines for energy efficiency. ENERGY STAR is a U.S. registered mark.

## Important safety instructions

When using this unit, basic safety precautions should always be followed to reduce the risk of fire, electric shock, or personal injury.

1. Read and understand all instructions.
2. Follow all warnings and instructions marked on this unit.
3. Unplug this unit from power outlets before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.
4. Do not use this unit near water, for example near a bathtub, wash bowl, kitchen sink, or the like.
5. Place the unit securely on a stable surface. Serious damage and/or injury may result if the unit falls.
6. Do not cover slots and openings on the unit. They are provided for ventilation and protection against overheating. Never place the unit near radiators, or in a place where proper ventilation is not provided.
7. Use only the power source marked on the unit. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.
8. For safety purposes this unit is equipped with a grounded plug. If you do not have this type of outlet, please have one installed. Do not defeat this safety feature by tampering with the plug.
9. Do not place objects on the power cord. Install the unit where no one can step or trip on the cord.
10. Do not overload wall outlets and extension cords. This can result in the risk of fire or electric shock.
11. Never push any objects through slots in this unit. This may result in the risk of fire or electric shock. Never spill any liquid on the unit.
12. To reduce the risk of electric shock, do not disassemble this unit. Take the unit to an authorized service center when service is required. Opening or removing covers may expose you to dangerous voltage or other risks. Incorrect reassembly can cause electric shock when the unit is subsequently used.
13. Unplug this unit from the wall outlet and refer servicing to an authorized service center when the following conditions occur:
  - A. When the power supply cord or plug is damaged or frayed.
  - B. If liquid has been spilled into the unit.
  - C. If the unit has been exposed to rain or water.
  - D. If the unit does not work normally by following the operating instructions. Adjust only controls covered by the operating instructions. Improper adjustment may require extensive work by an authorized service center.
  - E. If the unit has been dropped or physically damaged.
  - F. If the unit exhibits a distinct change in performance.
14. During thunderstorms, avoid using telephones except cordless types. There may be a remote risk of an electric shock from lightning.
15. Do not use this unit to report a gas leak, when in the vicinity of the leak.

## SAVE THESE INSTRUCTIONS

### INSTALLATION:

- Never install telephone wiring during a lightning storm.
- Never install telephone jacks in wet locations unless the jack is specifically designed for wet locations.
- Never touch uninsulated telephone wires or terminals unless the telephone line has been disconnected at the network interface.
- Use caution when installing or modifying telephone lines.

### WARNING:

- To prevent the risk of fire or electrical shock, do not expose this product to rain or any type of moisture.

### OTHER INFORMATION:

- Keep the unit away from electrical noise generating devices, such as fluorescent lamps and motors.
- The unit should be kept free from dust, high temperature and vibration.
- The unit should not be exposed to direct sunlight.
- Do not place heavy objects on top of this unit.
- Do not touch the plug with wet hands.

## Paper tray

The included paper tray is for letter size recording paper.  
Insert tabs on the paper tray into slots on the back of the unit.

### Note:

- Do not place the unit in an area where the paper tray may be obstructed (i.e. by a wall etc.).

---

### To use legal size paper

- Please purchase a legal paper tray, Model No. KX-FA52 (page 7) and install it.

KX-FA52  
Legal paper tray

## Document tray

Attach the document tray into the slots on the recording paper exit.

The recording paper will be ejected from the top of the unit after printing. The document tray prevents the printed paper from curling.

## Handset

Connect the handset cord.

# Installation

## Recording paper

Letter or legal size recording paper can be loaded. The unit can hold up to 50 sheets of 75 g/m<sup>2</sup> (20 lb.) paper. You may use 60 g/m<sup>2</sup> to 90 g/m<sup>2</sup> (16 lb. to 24 lb.) paper. See the note for paper specifications on page 95. **For superior results, we recommend Hammermill® Jet Print paper.** If you use legal size paper, please install a legal paper tray (page 12).

- 1 Fan the stack of paper to prevent a paper jam.

- 2 Pull the tension plate forward and hold open while inserting the paper.

- The paper should not be over the tab.
- If the paper is not inserted correctly, readjust the paper, or the paper may jam.

### To add paper

1. Pull the tension plate forward and hold open while removing all of the installed paper.
2. Add paper to the stack of paper you removed and straighten.
3. Fan the stack of paper.
4. Pull the tension plate forward and hold open while inserting the paper.

## Selecting the way to use your fax machine

You may already have other devices such as a telephone or computer besides the fax machine. You may use them in the same room or different room. Depending on your situation, select the way you prefer to use your fax machine.

- **Case 1:** Using the fax machine only (page 16)
- **Case 2:** Using the fax machine with an extension telephone (page 18)
- **Case 3:** Using the fax machine with computer (page 20)

## Connecting to a telephone line jack and power outlet

### To use surge protectors

- The warranty does not cover damage due to power line surges or lightning. For additional equipment protection, we recommend the use of a surge protector. The following types are available: TELESPIKE BLOK MODEL TSB (TRIPPE MFG. CO.), SPIKE BLOK MODEL SK6-0 (TRIPPE MFG. CO.), SUPER MAX (PANAMAX) or MP1 (ITW LINX).

### Caution:

- **When you operate this product, the power outlet should be near the product and easily accessible.**

### Note:

- To avoid malfunction, do not position fax machine near appliances such as TVs or speakers which generate an intense magnetic field.
- If any other device is connected on the same line, this unit may disturb the network condition of the device.

- 2** To stop recording, press **[STOP]** or replace the handset.

**Note:**

- There may be legal restrictions in your state on recording two-way telephone conversations. Inform the other party that the conversation is being recorded.

## Caller ID service from your phone company

This unit is compatible with the Caller ID service offered by your local telephone company. To use this feature, you must subscribe to a Caller ID service.

Change the following ring setting to 2 or more rings beforehand.

- TAD ring setting and FAX ring setting (feature #06 on page 70)

### How Caller ID is displayed

The calling party's name or telephone number will be displayed after the first ring. You then have the option of whether or not to answer the call depending on the caller.

The unit will automatically store the caller information (name, telephone number and the time of the call). You can view the caller information (page 35) and print the caller ID list (page 90).

#### Note:

- If the unit is connected to a PBX (Private Branch Exchange) system, you may not receive the caller information. Consult your PBX supplier.
- If the unit cannot receive caller information, the following will be displayed:
  - The caller dialed from an area which does not provide Caller ID service:

OUT OF AREA

- The caller requested not to send caller information:

PRIVATE CALLER

- The caller made a long distance call:

LONG DISTANCE

---

### To confirm caller information using the Caller ID list

The unit will store information for the most recent 30 callers.

- To print manually, see page 90.
- To print automatically after every 30 new calls, activate feature #26 (page 71).

## Viewing and calling back using caller information

You can easily view caller information and call back.

### Important:

- Calling back will not be possible in the following cases:
  - The telephone number includes data other than numbers (i.e. \* or #).
  - The caller information does not include a telephone number.

**1** Press **[CALLER ID]**.

# Receiving Faxes

## Activating TAD/FAX mode

- 1 Set feature #77 to "TAD/FAX" (page 74).
- 2 Press **[AUTO ANSWER]** until the following is displayed.

- The unit will play the pre-recorded greeting message.
- The display will show the number of rings before the unit answers a call in TAD/FAX mode.

- 3 If you wish to change the ring setting, press **[+]** or **[-]** until the desired setting is displayed, and press **[SET]**.
  - You can adjust the speaker volume after changing the ring setting. Press **[+]** or **[-]** while listening to the greeting message.
  - The remaining time for recording incoming messages will be displayed.

Example: 

TIME = 10m13s
---------------

### Note:

- The incoming message recording time can be changed (feature #10 on page 70).
- When the remaining time is low, erase unnecessary messages (page 58).
- While an incoming call is being recorded, you can monitor it through the speaker. If this feature is not required, set feature #67 to off (page 73).

## How to receive calls

When receiving calls, the unit works as a fax and/or answering device.

- If the call is a phone call, the answering machine will record voice message automatically.
- If a fax calling tone is detected, the fax machine will receive a fax automatically.

### Ring setting in TAD/FAX mode

You can choose from 1, 2, 3, 4, "TOLL SAVER" and "RINGER OFF". This setting can be changed by feature #06 on page 70.

- "TOLL SAVER": When you call the unit from a remote location, the number of rings will tell you if there are any new voice messages. If the unit answers on the 2nd ring, there is at least one new recorded message. If the unit answers on the 4th ring, there are no new recorded messages. To save the toll charges for the call, hang up immediately when you hear the 3rd ring. The 3rd ring indicates that there are no new recorded messages.
- "RINGER OFF": The unit will answer without ringing.
- If you subscribe to a Caller ID service, set to 2 or more rings.

## Using two or more phone numbers in a single telephone line

The Distinctive Ring service is a service offered by your local telephone company. This service provides several telephone numbers for a single telephone line, and the ring pattern differs according to which telephone number the call was addressed to. Originally, this service was designed for the purpose of allowing different ring patterns to distinguish which number the call was addressed to.

This unit distinguishes the different ring patterns. If the ring pattern is one which assigned for a fax, the fax machine will automatically start fax reception. This service is convenient if you wish to have a different number for fax in a single telephone line.

**To use this service, you must subscribe to the Distinctive Ring service of your local telephone company.**

### Activating the Distinctive Ring feature

### How to receive calls

If the incoming call is for the fax number, the fax machine will ring with the assigned ring pattern and automatically start fax reception.

If the incoming call is for the phone number;

- the fax machine will keep on ringing in TEL mode.
- the fax machine will record voice message in TAD/FAX mode.
- fax communication will be attempted in FAX ONLY mode.

## If you use three or more phone numbers

You may wish to use three or more phone numbers for a single telephone line to distinguish which number the call was addressed to. A different ring pattern must be assigned for each number.

### Example: Using three phone numbers

Telephone number	Ring pattern	Use
012 1234	Standard ring	Personal
012 5678	Double ring	Business
012 9876	Triple ring	Fax

To use one phone number for fax, program the ring pattern assigned for fax in feature #32. In the example, the ring pattern assigned for fax is triple ring, so you should program "C" (triple ring).

Ring pattern	Settings in feature #32
Standard ring (one long ring)  1st ring      2nd ring	<b>A</b>
Double ring (two short rings)  1st ring      2nd ring	<b>B</b>
Triple ring (short-long-short rings)  1st ring      2nd ring	<b>C</b>
Other triple ring (short-short-long rings)  1st ring      2nd ring	<b>D</b>

3. Press **[START]**.

### Example: Making 2 copies of a 4-page original document

#### Note:

- The unit will store the documents into memory while collating the copies. If memory becomes full while storing, the unit will only print out the stored pages.
- After copying, the collating feature will turn off automatically.

## Recording your own greeting message

You can record your own greeting message for TAD/FAX mode. The recording time will be limited to 16 seconds. We recommend you record your message within 12 seconds to make it easier to receive faxes.

**Suggested message for TAD/FAX greeting:** "This is (your name, business and/or telephone number). We are unable to answer right now. To send a fax, start transmission. To leave a message, speak after the beep. Thank you."

### Note:

- You can choose 60 seconds for your own TAD/FAX greeting message (feature #54 on page 73).
  - If you change to 60 seconds, we recommend that you tell the caller in your own TAD/FAX greeting message to press ✕9 before starting fax transmission.
  - If you change to 16 seconds from 60 seconds, your own TAD/FAX greeting message will be deleted. When receiving a call, the pre-recorded greeting message will be played.

# Frequently Asked Questions

---

## When a function does not work, check here

### General

---

#### I cannot make and receive calls.

- The power cord or telephone line cord is not connected. Check the connections.
- If you used a splitter to connect the unit, remove the splitter and connect the unit to the wall jack directly. If the unit operates properly, check the splitter.

---

#### I cannot make calls.

- The dialing mode setting is wrong. Change the setting of feature #13 (page 70).

---

#### The unit does not work.

- Disconnect the unit from the telephone line and connect the line to a known working telephone. If the working telephone operates properly, contact our service personnel to have the unit repaired. If the working telephone does not operate properly, contact your telephone company.

---

#### The unit does not ring.

- The ringer volume is set to off. Adjust it (page 23).
- The ring setting of feature #06 is set to "RINGER OFF". Change to another ring setting (page 70).

---

#### The unit displays the following though the paper is inserted.

CHECK PAPER

- The paper is inserted halfway. Insert it correctly (page 14) and press **[SET]** to clear the message.

---

#### The other party complains they only hear a fax tone and cannot talk.

- FAX ONLY mode is set. Tell the other party the number is only used for faxes.
- Change to TEL mode or TAD/FAX mode by pressing **[AUTO ANSWER]**.
- If you use a Distinctive Ring service, turn AUTO ANSWER off so that the fax machine is in TEL mode.
- If you use a Distinctive Ring service, make sure you have set the same ring pattern assigned by the telephone company (page 49).

---

#### The receiving mode does not function properly.

- A Distinctive Ring of feature #31 is set (page 49).

---

#### The **[REDIAL/PAUSE]** button does not function properly.

- If this button is pressed during dialing, a pause will be inserted. If pressed immediately after a dial tone is obtained, the last number dialed will be redialed.

---

#### During programming, I cannot enter the code or ID number.

- All or part of the numbers are the same. Change the number: feature #11 (page 70), #41 (page 72), #51 and #52 (page 73).

---

#### The ink film runs out quickly.

- The help printing function, copy function, and reports also use ink film.

---

#### Whenever I try to retrieve my voice mail messages, the retrieval is interrupted by the fax tone.

- You are probably entering ✕#9. This is the default setting for the fax activation code. If you use a voice mail service, set the fax activation feature to off or reprogram the activation code (feature #41 on page 72).

---

#### The speakerphone is not working.

- Use the speakerphone in a quiet room.
- If you have difficulty hearing the other party, adjust the volume.

## Fax – sending

---

#### I cannot send documents.

- The other party's fax machine is busy or has run out of recording paper. Try again.
- The other party's machine is not a fax machine. Check with the other party.
- The other party's fax machine rings too many times. Send the fax manually (page 38).

# Frequently Asked Questions

---

---

## The other party complains that letters on their received document are distorted or not clear.

- If your line has special telephone services such as call waiting, the service may have been activated during fax transmission. Connect the unit to a line that does not have these services.
- The extension telephone on the same line is off the hook. Hang up the extension telephone and try again.
- Try copying the document. If the copied image is clear, there may be something wrong with the other party's machine.

---

## The other party complains that smudges or black lines appear on their received document.

- The glass or rollers are dirty. Clean them (page 87).

---

## I cannot send a fax overseas.

- Use the overseas transmission mode of feature #23 (page 71).
- Add two pauses at the end of the telephone number or dial manually.

## Fax – receiving

---

### I cannot receive documents.

- When you have a single telephone line and subscribe to a voice mail service, you must also subscribe to a Distinctive Ring service (page 49).

---

### I cannot receive documents automatically.

- The receiving mode is set to TEL mode. Set to TAD/FAX mode or FAX ONLY mode by pressing **[AUTO ANSWER]**.
- The time taken to answer the call is too long. Decrease the number of rings of feature #06 (page 70).
- The greeting message is too long. Shorten the message (page 54).

---

### The display shows the following, but faxes are not received.

CONNECTING.....

- The incoming call is not a fax. Change the receiving mode to TAD/FAX mode or TEL mode by pressing **[AUTO ANSWER]**.

---

### A blank sheet is ejected.

- If a blank sheet is ejected after the received document is printed out, the receiving reduction rate is not programmed correctly. Program the proper rate in feature #36 (page 72).
- The other party placed the document in their fax machine the wrong way. Check with the other party.

---

### A white line or a smudge appears on your recording paper.

- The glass or rollers are dirty. Clean them (page 87).

---

### The printing quality is poor.

#### Note:

Please do not reuse the ink film!

For best results, use genuine Panasonic replacement film. Refer to page 7 for further details.

- The other party sent a faint document. Ask them to send a clearer copy of the document.
- The thermal head is dirty. Clean it (page 88).
- Some paper has instructions recommending which side to print on. Try turning the paper over.
- You may have used paper with a cotton and/or fiber content that is over 20%, such as letterhead or resume paper. We recommend smooth paper such as "Hammermill Jet Print" for clearer printing.

---

### The other party complains that they cannot send a document.

- The memory is full of received documents due to a lack of recording paper or a recording paper jam. Install paper (page 14) or clear the jammed paper (page 83).

# Frequently Asked Questions

---

## Receiving mode

### I cannot select the desired receiving mode.

- If you want to set TAD/FAX or FAX ONLY mode:
  - select the desired mode using feature #77 (page 74), and

## Answering device

### I cannot retrieve recorded messages from a remote location.

- Press the remote operation ID correctly and firmly (page 60).

### Messages in the mailbox do not play back.

- The mailbox password is wrong. Enter the correct password.
  - For mailbox 1 password, see feature #51 on page 73.
  - For mailbox 2 password, see feature #52 on page 73.

### The other party complains that they cannot leave a voice message.

- The memory is full. Erase unnecessary messages (page 58, 64).

## If a power failure occurs

- The unit will not function.
- The unit is not designed for making emergency telephone calls when the power fails. Alternative arrangements should be made for access to emergency services.
- Fax transmission and reception will be interrupted.
- If the delayed transmission (feature #25 on page 71) is programmed and the start time is passed during a power failure, transmission will be attempted soon after power is restored.
- If any fax documents are stored in the memory, they will be lost. When power is restored, a power down report will be printed out stating which contents in the memory have been erased.

# FCC and Other Information

---

## FCC and Other Information

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the rear of this equipment is a label that contains, among other information, a product identifier in the format US:ACJ-----.

If requested, this number must be provided to the telephone company.

- Registration No .....(found on the rear of the unit)
- Ringer Equivalence No. (REN)  
.....(found on the rear of the unit)

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., 03 is a REN of 0.3).

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.

If trouble is experienced with this equipment, for repair or warranty information, please contact a Factory Servicenter or other Authorized Servicer. If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information.

This equipment is hearing aid compatible as defined by the FCC in 47 CFR Section 68.316.

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

### WHEN PROGRAMMING EMERGENCY NUMBERS AND(OR) MAKING TEST CALLS TO EMERGENCY NUMBERS:

- 1) Remain on the line and briefly explain to the dispatcher the reason for the call.
- 2) Perform such activities in the off-peak hours, such as early morning or late evenings.

The software contained in this equipment to allow user access to the network must be upgraded to recognize newly established network area codes and exchange codes as they are placed into service. Failure to upgrade the premises systems or peripheral equipment to recognize the new codes as they are established will restrict the customer and the customer's employees from gaining access to the network and to these codes.

### NOTE:

Many states have imposed regulations on the manner in which 2-way telephone conversations may be recorded, so you should inform the other party that the conversation is being recorded. Consult your local telephone company for further information.

### CAUTION:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this device.

### NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a

particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## Panasonic Facsimile Product Limited Warranty

### Limited Warranty Coverage

If your product does not work properly because of a defect in materials or workmanship, Panasonic Consumer Electronics Company or Panasonic Sales Company (collectively referred to as “the warrantor”) will, for the length of the period indicated on the chart below, which starts with the date of original purchase (“warranty period”), at its option either (a) repair your product with new or refurbished parts, or (b) replace it with a new or a refurbished product. The decision to repair or replace will be made by the warrantor.

FAX categories	Parts	Labor
Thermal Transfer Facsimile	6 Months	6 Months
Laser Facsimile	1 (one) Year	1 (one) Year

Batteries, antennas, ink film, toner cartridge, drum unit, and ink cartridge (as may be applicable), and cosmetic parts (cabinet) are not warranted under this Limited Warranty.

During the “Labor” warranty period there will be no charge for labor. During the “Parts” warranty period, there will be no charge for parts. You must carry-in or mail-in your product during the warranty period. This warranty only applies to products purchased and serviced in the United States or Puerto Rico. This warranty is extended only to the original purchaser of a new product which was not sold “as is”. A purchase receipt or other proof of the original purchase date is required for warranty service.

### Carry-In or Mail-In Service

For Carry-In or Mail-In Service in the United States call 1-800-HELP-FAX (1-800-435-7329)  
For assistance in Puerto Rico call Panasonic Sales Company (787)-750-4300 or fax (787)-768-2910.

### Limited Warranty Limits And Exclusions

This warranty ONLY COVERS failures due to defects in materials or workmanship, and DOES NOT COVER normal wear and tear or cosmetic damage. The warranty ALSO DOES NOT COVER damages which occurred in shipment, or failures which are caused by products not supplied by the warrantor such as non Panasonic ink film, toner cartridge or drum unit, or failures which result from accidents, misuse, abuse, neglect, mishandling, misapplication, alteration, faulty installation, set-up adjustments, signal reception problems, misadjustment of consumer controls, improper maintenance, power line surge, improper voltage supply, lightning damage, modification, or commercial use (such as in a hotel, office, restaurant, or other business), rental use of the product, service by anyone other than a Factory Servicenter or other Authorized Servicer, or damage that is attributable to acts of God.

**THERE ARE NO EXPRESS WARRANTIES EXCEPT AS LISTED UNDER “LIMITED WARRANTY COVERAGE”. THE WARRANTOR IS NOT LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT, OR ARISING OUT OF ANY BREACH OF THIS WARRANTY.** (As examples, this excludes damages for lost time, cost of having someone remove or re-install an installed unit if applicable, or travel to and from the servicer. The items listed are not exclusive, but are for illustration only.) **ALL EXPRESS AND IMPLIED WARRANTIES, INCLUDING THE WARRANTY OF MERCHANTABILITY, ARE LIMITED TO THE PERIOD OF THE LIMITED WARRANTY.**

Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the exclusions may not apply to you.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state. If a problem with this product develops during or after the warranty period, you may contact your dealer or Servicenter. If the problem is not handled to your satisfaction, then write to the warrantor's Consumer Affairs Department at the addresses listed for the warrantor.

**PARTS AND SERVICE WHICH ARE NOT COVERED BY THIS LIMITED WARRANTY ARE YOUR RESPONSIBILITY.**

**For product service**

- Call toll-free 1-800-HELP-FAX (1-800-435-7329) for the location of an authorized servicer.

**For out of warranty technical support**

- After the warranty has expired, please contact our Continued Services Technical Support Line at 1-900-555-PANA (1-900-555-7262) for support on a fee basis.

**When you ship the product**

- Carefully pack your unit, preferably in the original carton.
- Attach a letter, detailing the symptom or problem, to the outside of the carton.
- Send the unit to an authorized servicer, prepaid and adequately insured.
- Do not send your unit to the Panasonic Consumer Electronics Company or to any executive or regional sales office. These locations do not repair consumer products.

Panasonic knows that if your fax machine is not up and running, neither is your business. That's why we created the Panasonic Fax Advantage Program. Included at no extra cost with the purchase of a new and unused Panasonic Fax Machine, the Fax Advantage Program can provide a free replacement unit<sup>3</sup> if your original unit is in need of repair.

#### **Here's how it works:**

1. If you have a problem with your fax that you purchased new and unused while it is covered by the period of limited warranty<sup>1</sup>, call our toll-free help-line at 1-800-HELP-FAX<sup>2</sup>.
2. Talk to one of our technical experts to diagnose your problem over the phone.
3. If repairs are necessary and you are entitled to service under the terms and conditions of the limited warranty<sup>4</sup>, we will send a refurbished replacement unit to you by UPS Ground service delivery. The shipping method is upgradable for an extra charge.

A second option available under our limited warranty is to mail-in or carry-in your fax to one of our Regional Service centers, where the unit will be repaired and returned to you.

#### **Instructions:**

If you choose to receive a replacement unit under the Fax Advantage Program, Panasonic will provide a replacement unit which will be completely refurbished, quality-tested by Panasonic technicians and individually hand-inspected before it is shipped to you. You will keep the replacement unit and send the original unit to us in the replacement unit's box. UPS will pick up the unit at no charge to you, should it be determined that you are entitled to warranty service. A proof-of-purchase must be included with the returned product. Any unit that is replaced by Panasonic and not shipped with proper proof-of-purchase by you will be subject to a minimum \$100.00 charge. The original unit must be properly packaged in the same manner as the replacement unit, utilizing the packing materials provided. Damage due to improper or inadequate packing will be charged to you as an out-of-warranty cost.

If our 1-800-HELP-FAX technicians determine that your unit may be an "out-of-box failure"<sup>5</sup>, we will attempt to provide you with a factory-new replacement unit<sup>6</sup>. You must ship a copy of your receipt with your original unit to verify that you purchased the unit within 10 days prior to your 1-800-HELP-FAX call.

#### **Requirements:**

You must give our technicians a valid credit card number (Discover, VISA, Master Card, or American Express/Optima). Product that is not returned to Panasonic by 10 business days after shipment of the replacement product will be charged to your credit card account at Panasonic's Suggested Retail Price (see dealer for details). If your original unit is not eligible for warranty service, your card will be charged for the non-warranty repair of the unit at Panasonic's current rate for parts and labor and for any shipping charges associated with this program. If you do not wish to pay out-of-warranty repair costs, you will be responsible for returning the replacement unit to Panasonic and for paying all shipping charges associated with this program including the UPS delivery of the replacement product to you, shipment of the problem unit to Panasonic, shipment of the replacement unit back to Panasonic and the return of your original unit back to you. Credit status will be verified prior to sending the replacement product.

1. See dealer for limited warranty details.
2. After the fax advantage program, contact our Continued Services Technical Support Line at 1-900-555-PANA (1-900-555-7262), for fee based technical support.
3. Replacement unit is refurbished.
4. Replacement program is only available in the 50 United States and is subject to termination at any time without advance notice.
5. "Out-of-box failure" is an inoperable unit that was purchased no more than 10 days prior to your 1-800-HELP-FAX call, and would otherwise qualify for warranty service under the terms and conditions of the limited warranty.
6. Panasonic reserves the right to send a refurbished unit.
